

NARCIS: verified coverless signaling from unchanged natural images

Largest feasible alphabet is selected only when every protected-message symbol has sufficient qualified covers

BOSSBase
1,050 / 1,050 recoveries
98.74% mean accuracy

Caltech-101 RGB
525 / 525 recoveries
98.59% mean accuracy

Selection leakage audit
Caltech seed 47: AUC 0.533
95% CI [0.517, 0.548]

Measured scope: 5 seeds per dataset, 21 conditions; net rate 0.184 to 1.213 bits/cover across tested payload sizes
